

PHILODENDRON

PHILODENDRON

PLANT CHARACTERISTICS

Size

10-12' high, 3-6' wide

Sun/Shade

Part shade

Water

Medium

Maintenance

Low

Life Span

Vine, Zones 11-12

Description

Grown as a houseplant in Zone 6. Likes bright indirect light. Water regularly during its growing season, but reduce water in late fall to winter. Pinching stems promotes bushier growth. No serious insect or disease problems but watch for aphids, spider mites, mealybugs, and scale. If soil is too wet it will develop root rot.
