

COLEUS

PLECTRANTHUS SCUTELLARIOIDES

PLANT CHARACTERISTICS

Size

.5-3' high, .5-3' wide

Sun/Shade

Part shade to full shade

Water

Medium

Maintenance

Low

Life Span

Herbaceous perennial, Zones 10-11

Description

Grown as an annual in Zone 6. Plants can be started from seed 8-12 weeks before the last frost date. Has showy multi-colored leaves. Tolerates heavy shade. No serious insect or disease problems but if grown as an indoor plant aphids, spider mites, and whiteflies can be an issue. Too much sun causes wilting, and too much shade causes plants to become leggy.
