

DOUGLAS FIR

PSEUDOTSUGA MENZIESII

PLANT CHARACTERISTICS

Size

40-80' high, 12-20' wide

Sun/Shade

Full sun

Water

Medium to wet

Maintenance

High

Life Span

Needled Evergreen, Zones 4-6

Description

Has unique forked cone bracts which can grow to 4-5" long. Flat, linear, dark green needs (up to 1.5" long). Tree is shaped in a narrow pyramid when young and then growing into a cylindrical shape as it ages. No serious insect or disease problems. This is one of the largest trees in the world so think carefully about where to plant it.
